

Figure 1 consists of two schematic diagrams. Diagram (a) is a top view showing a horizontal channel with a central region of interest. The channel is defined by two parallel lines, and the central region is marked by a dashed circle. Diagram (b) is a side view showing the channel and the central region of interest. The channel is defined by two parallel lines, and the central region is marked by a dashed circle. The diagrams illustrate the experimental setup for studying the dynamics of a fluid in a channel.
